## NQ WET SEASON

A True Wet Season Supplement for cost effective Phosphorus  
Supplementation in Deficient Country.

**NQ Wet Season** is a high mineral and medium protein supplement suitable for feeding to cattle in northern phosphorus deficient country on Green/Wet Season Feed until feed begins to hay off.

**NQ Wet Season** lick can also be used as an introduction to higher urea dry feed lick supplementation to satisfy mineral cravings and reduce the risk of overconsumption especially in breeders not supplemented over the wet season.

**Effective Phosphorus supplementation** on deficient country increases dry matter intakes by up to 40% leading to improved growth rates in growing cattle and improved fertility and milk production in breeders.

### Nutritional Analysis (As Fed Basis):

Min. Equivalent Crude Protein	37.5%
Min. Total Protein	37.5%
Urea Equivalent	10.0%
Calcium	12.0%
Phosphorus	10.0%
Sulphur	4.0%
Salt	22.0%
Trace Mineral-Vitamin Premix	0.5%

### Daily Intakes (per head per day):

Animal Class	Grams per day
Weaner/Grower	50 – 100
