Equine ProMin +

A Protein, Calcium, Phosphorus and Mineral Supplement for Horses
Grazing Tropical Grass Pastures.

Equine ProMin + is specifically formulated to supply nutrients often lacking or not available to horses and other equines when grazing Tropical (Summer Growing) Grasses.

Calcium in Tropical Grass Pastures is bound by oxalates, this combined with a number of imbalances for other nutrients leads to a calcium deficiency. This supplement supplies a range of elements, Fat Soluble Vitamins and Amino Acids often missing from the diet and essential for the nutritional balance of the horse. With a balanced supplement the horse is able to absorb and retain calcium and other bone forming minerals.

Equine ProMin + can be fed every day as part of a balanced ration, giving the satisfaction of knowing that horses are receiving the nutrients they require. Essential Amino Acids, Fatty Acids, Macro Minerals, Trace Minerals & Fat Soluble Vitamins are included to meet the requirements of all horses. The balance of these nutrients is designed specifically for Equines grazing Tropical Grass pastures.

Nutritional Analysis (As Fed Basis):

Min. Crude Protein	23.0%
Min. Crude Fat	6.0%
Max. Crude Fibre	10.0%
Min. Calcium (Ca)	7.5%
Min. Magnesium (Mg)	1.6%
